

Innovative. Quick. Simple.

Business Unit Industrial Tyres

# The Industrial Tyre Revolution

Solid Super-Elastic tyres are robust, durable and require minimal servicing. They save energy and are exceptionally shock and wear resistant. That's why, for many applications, Super-Elastic tyres are the first choice – and in particular Continental's premium CSE range. Now Continental's engineers have developed a new range of tyres that will revolutionise Super-Elastic tyres forever. Introducing CSEasy – quick, easy, flexible fitment.

CSEasy is the first Super-Elastic tyre that requires no press, specialist technician or equipment. Tyres can be fitted in situ, as soon as the tyre breakdown occurs, ensuring the forklift is back in full operation in minutes.

## Press-less fit to rim

The key to CSEasy is the innovative adapter which is placed between the tyre and rim. Thanks to the adapter's conical shape, the tyre is already in position and is simply screwed onto the rim using a torque wrench – making the press redundant.

## CSEasy does it

Two hands and a torque wrench are all you need to fit the new CSEasy tyre on any Lemmerz type rim.

# Super-Elastic Tyre fitting with no press

## More flexibility

- No press required, fitted in situ with no time delay
- No need to hold rims in stock, no exchange system, no special tools
- Easy fitting – two hands and a torque wrench is all you need
- Reusable adapter

*"I can sum up mounting the CSEasy in just four words – simple, fast, reliable, economical."*  
Regis Monnot, Fenwick-Linde  
(Peugeot PSA, Vesoul, France)

*"I am really impressed at how simple the CSEasy is to mount. No press is needed which means the tyre can be mounted wherever the vehicle is."*  
Francis Blaser, Aprolis  
(Kronenbourg, Champigneules, France)

*"Mounting CSEasy is really simple and doesn't even require a press."*  
Mr. Beyler, Firma Kuhn  
(Saverne, Francia)

## More performance

CSEasy tyres offer operational benefits over conventional Super-Elastic tyres:

- Optimised fit, more durability
- Less rolling resistance reduces energy consumption
- Faster, more precise steering
- Safer thanks to improved stability
- Reduced heat build-up
- Enhanced performance in tough environments

# CSEasy will be introduced in the following sizes:

Available from 01/2006:	180/70-8	7.00-12	
Available from 04/2006:	125/75-8		
Available from 07/2006:	150/75-8	200/75-9	225/75-10
Available from 10/2006:	6.00-9	250/75-12	
Available from 01/2007:	5.00-8		
Available from 07/2007:	6.50-10
